Introduction

The durable Dyconn Pad Folio case is the perfect companion for your iPad. The Pad Folio comes fully equipped with a built-in wireless Bluetooth 2.0 full QWERTY keyboard. The keyboard uses real plastic keys, which you find on full-size laptops. This, in turn, provides easier typing and quicker keystrokes. As a measure of durability, the Pad Folio sports resilient Eco Leather, which is stylish as it is protective. More impressively, the Pad Folio leather housing enclosure is removable from the external keyboard case, which makes for easy mobility and enjoyment. Viewing your iPad is made easy with the Pad Folio's inherent angled display stand for convenient viewing while typing. Simply position your device in the upward-angled position and enjoy, it's that easy.

Troubleshooting Tips

If you are unable to sync the Pad Folio keyboard to your iPad, please implement the following:

- Please check to see if the battery is charged. In the event the battery is low, keystrokes and responsiveness will be slow or ineffective. As such, connect the Pad Folio to an energy source to complete a full battery charge.
- Check the power switch to make certain that the unit is On. When the Pad Folio is On, the green power light above the keyboard will flash for two seconds.
- Restart the Bluetooth Switch to make sure the Pad Folio is discoverable.
- Make certain the iPad syncing PIN password is correct.

Preventative Maintenance

- Due to the Pad Folio's Eco Leather material, exercise care during use to avoid scratches and/or corrosion to the external casing.
- Please operate the Pad Folio in accordance to the instructions set-forth in this manual. Dyconn is not responsible for any damage and/or injury resulting from inappropriate use or operation of this product.
